

RUPESH KUMAR PANDEY

SENIOR DATA SCIENTIST | AI/ML | GENERATIVE AI | PREDICTIVE ANALYTICS

Bengaluru, India | +91 88673 82604 | amerupesh08@gmail.com

[LinkedIn](#) | [GitHub](#) | [Portfolio](#) | [PGP Portfolio](#)

PROFESSIONAL SUMMARY

Data Science and AI professional with hands-on experience on Data Science, Machine Learning, Predictive Analytics and GenAI experience. Currently working as a Senior Technical Lead at Persistent Systems supporting Blue Yonder Transportation Management solutions. Experienced in building predictive models, translating business problems into analytical solutions, and partnering with product, engineering and business stakeholders. Strong background across transportation, supply chain, retail, automotive, telecom and enterprise software, with an additional foundation in technical leadership and engineering documentation.

CORE COMPETENCIES

Machine Learning & Predictive Modeling: Regression, Classification, Random Forest, XGBoost, SVM, KNN, Naive Bayes, Decision Trees, Feature Engineering, Model Evaluation

Generative AI & AI: LLM-based solutions, GenAI-assisted workflows, AI/ML application concepts

Data Science & Analytics: Python, SQL, EDA, Statistical Analysis, Clustering, PCA, RFM, Market Basket Analysis

Forecasting: Time-Series Analysis, ARIMA, SARIMA, Exponential Smoothing, Moving Average, Confidence Intervals

BI & Visualization: Tableau, Power BI, Matplotlib, Seaborn, Executive Dashboards

Tools & Platforms: Pandas, NumPy, Scikit-learn, Git, Jupyter, Google Colab, KNIME

PROFESSIONAL EXPERIENCE

Senior Technical Lead – Data Science & Generative AI | Persistent Systems

Aug 2023 – Present | Client: Blue Yonder

- Lead data science and predictive analytics initiatives for Blue Yonder Transportation Management solutions, focusing on transportation analytics, operational intelligence and predictive use cases.
- Develop and evaluate machine-learning models for transit-time and ETA prediction using large transportation datasets and lane-level operational features.
- Translate business and product requirements into analytical approaches, model features, evaluation strategies and actionable insights in collaboration with product managers, engineers and business stakeholders.
- Contribute to integrating ML-driven capabilities into TM Configuration, TMIC and Business Analytics modules.
- Apply GenAI and LLM-based approaches to AI-powered documentation and knowledge workflows, bridging domain expertise with emerging AI capabilities.

Lead – Data Science | Brillio

Jul 2022 – Jul 2023 | Client: BluePlanet Enterprise (Ciena)

- Analyzed structured and unstructured data to generate actionable business insights and support product and operational decisions.
- Designed and delivered executive dashboards using Tableau and Power BI, converting complex data into decision-ready KPIs.
- Performed data cleaning, validation and analytical quality checks to improve reliability of reporting and insights.

Lead – Technical Documentation | Citixsys

Feb 2022 – Jun 2022 | Client: OneEnterprises

- Developed Power BI and Tableau dashboards and reports and performed data mining and trend analysis to support business decision-making.

Senior Engineer – Technical Documentation | Mindtree

Dec 2021 – Jan 2022 | Client: Sabre

- Documented automated seat-allocation systems for airline loyalty platforms and assessed data sources and analytics approaches for operational improvements.

Senior Engineer – Avionics & Engineering Documentation | Sonovision (Ortec Group)

Aug 2014 – Nov 2021 | Client: Airbus

- Created engineering diagrams and service bulletins for Airbus aircraft programs and supported aircraft modification, compliance and technical documentation activities.
- Participated in on-site knowledge exchange at Airbus Toulouse, France, demonstrating cross-functional collaboration in a global engineering environment.

SELECTED DATA SCIENCE & AI PROJECTS

Transit Time Prediction | Blue Yonder TMS

Enterprise Transportation Analytics

- Built XGBoost-based predictive models to improve ETA and transit-time prediction across transportation lanes; translated model outputs into operationally relevant insights.

Fleet Failure Prediction | Zoom Car

Predictive Maintenance

- Built a Random Forest predictive model for fleet failure risk and reported an 18% reduction in fleet breakdowns in the project outcome.

Customer Churn & Customer Lifetime Value Prediction | Customer Analytics

Retention & Marketing

- Applied Logistic Regression and XGBoost to churn/CLV-oriented modeling and reported a 20% improvement in retention campaign ROI in the project outcome.

Real-Time Twitter Sentiment Analysis | NLP

Streaming / Social Analytics

- Developed sentiment classification using VADER and LSTM approaches and achieved 87% accuracy in the project evaluation.

Supply Chain Optimization | FMCG / Retail

Inventory Optimization

- Analyzed warehouse-level demand and supply patterns, used EDA, clustering and classification, and translated model outputs into warehouse-level supply recommendations.

Demand & Sales Forecasting | Retail / FMCG

Time-Series Forecasting

- Compared Moving Average, Exponential Smoothing, ARIMA and SARIMA approaches and generated 12-month forecasts with lower and upper confidence limits for business planning.

Customer Buying Patterns & Revenue Optimization | Retail / Auto Parts

Customer Analytics

- Analyzed three years of transaction data, applied RFM segmentation and Market Basket Analysis, and translated purchase associations into bundling, cross-selling and promotional recommendations.

EDUCATION

-
- Master of Data Science (Global) — Deakin University, Australia
 - Post Graduate Program in Data Science & Business Analytics — Great Learning / UT Austin
 - MBA – Product & Marketing Management — ISBM University
 - Bachelor of Electrical Engineering — IIAS, Jamshedpur

CERTIFICATIONS & PROFESSIONAL LEARNING

-
- Generative AI with ChatGPT
 - Data Science & Business Analytics
 - Data Visualization & Storytelling
 - Git Version Control & Collaboration

TARGET POSITIONING

Target roles: Senior Data Scientist | Lead Data Scientist | Applied Scientist | Machine Learning Engineer | AI/ML Lead | Generative AI / AI Solutions Lead. This resume intentionally emphasizes production-facing data science, predictive analytics, domain depth, stakeholder leadership and GenAI exposure rather than positioning the profile as an entry-level data scientist.
