

RUPESH KUMAR PANDEY

Data Scientist | Machine Learning | Predictive Analytics | Business Analytics

Email: amerupesh08@gmail.com | Mobile: +91 8867382604 | Location: Whitefield, Bengaluru, India

LinkedIn: linkedin.com/in/rupesh-kumar-pandey-9016543b/ | Portfolio: rupesh4113.github.io/Portfolio/

RESUME OBJECTIVE

Results-oriented Data Scientist with progressive leadership in statistical modeling, machine learning, and quantitative analytics. Seeking to leverage hands-on expertise in Machine Learning, Predictive Analytics, Customer Analytics, Supply Chain Analytics, and Retail/FMCG business analytics to build scalable data-driven decision frameworks that optimize operations and drive measurable commercial impact.

PROFILE SUMMARY

- **Data Science & Machine Learning:** Hands-on experience developing end-to-end predictive analytics, supervised classification, and clustering pipelines across Retail, FMCG, Transportation, and Telecom.
- **Customer & Supply Chain Optimization:** Expertise in RFM segmentation, customer propensity, churn modeling, warehouse-level demand-supply balancing (achieved 92% classification accuracy), and inventory optimization.
- **Time-Series Forecasting:** Proven capability evaluating ARIMA, SARIMA, and Exponential Smoothing models over 3+ years of transaction data to generate reliable 12-month forward forecasts with 95% confidence intervals.
- **Analytics Engineering & BI:** Advanced proficiency in SQL (window functions, subqueries, aggregations), Python (Pandas, NumPy, Scikit-learn), Tableau dashboard design, and translating complex mathematical findings into executive insights.

TECHNICAL & ANALYTICAL SKILLS

Programming & Data:	Python, Pandas, NumPy
Machine Learning:	Scikit-learn, Logistic Regression, Decision Tree, Random Forest, SVM, KNN, Naive Bayes, LDA, Clustering, PCA
Forecasting:	ARIMA, SARIMA, Exponential Smoothing, Moving Average, Time-Series Analysis
Customer Analytics:	RFM Analysis, Customer Segmentation, Market Basket Analysis, Association Analysis, Customer Propensity, Churn-Oriented Modeling
Supply Chain:	Demand Analytics, Supply Analytics, Inventory Optimization, Warehouse Segmentation, Demand Forecasting
SQL & Database:	MySQL, SQL, JOINS, Subqueries, CASE Statements, Aggregate Functions, Window Functions
Business Intelligence:	Tableau, Dashboard Design, Data Visualization, KPI Development
Analytics Platforms:	KNIME, Jupyter Notebook

PROFESSIONAL EXPERIENCE

- Senior Tech Lead – Data Science** **Aug 2023 – Present**
Persistent Systems — Bengaluru | Client/Platform: Blue Yonder
 - Led transit-time and ETA prediction initiatives for Blue Yonder Transportation Management System (TMS), improving logistics planning precision.
 - Architected, benchmarked, and deployed machine-learning models (XGBoost, Random Forest, Time-Series) on high-volume logistics freight records.
 - Integrated predictive models into TM Configuration, TMIC, and Business Analytics modules for automated dispatching and exception mitigation.
- Lead – Data Science & Technical Documentation** **Jul 2022 – Jul 2023**
Brillio — Bengaluru | Client/Platform: BluePlanet Enterprise (Cienna)
 - Analyzed structured and unstructured telecom network telemetry data to identify customer usage patterns and operational bottlenecks.
 - Engineered executive reporting and visual KPI dashboards using Tableau and Power BI for enterprise decision-makers.
 - Executed automated data cleaning, pipeline validation, and exploratory data analysis ensuring high-integrity analytical outputs.
- Lead – Technical Documentation** **Feb 2022 – Jun 2022**
Citixsys — Noida | Client/Platform: OneEnterprises
 - Developed business intelligence dashboards and operational reports using Power BI and Tableau for omnichannel retail operations.
 - Conducted SQL-based data mining, trend evaluations, and store-level performance tracking supporting management decisions.
- Senior Engineer – Technical Documentation** **Dec 2021 – Jan 2022**
Mindtree — Bengaluru | Client/Platform: Sabre
 - Documented automated seat-allocation and reservation analytics systems for airline loyalty platforms.
 - Assessed data schemas and analytical workflows to identify operational efficiencies and system scalability improvements.

Sonovision (Ortec Group) — Bengaluru | Client: Airbus

- Authored mission-critical systems engineering documentation, modification blueprints, and service bulletins for commercial aircraft programs.
- Ensured strict compliance with international aviation regulatory authorities and aerospace quality governance standards.
- Selected for high-profile international technical knowledge exchange assignment at Airbus Headquarters in Toulouse, France.

EDUCATIONAL BACKGROUND

Master of Data Science (Global)	Deakin University, Australia
PG Program in Data Science & Business Analytics	Great Lakes Institute / Great Learning / UT Austin
Bachelor of Electrical Engineering	IIAS, Jamshedpur

CERTIFICATIONS & CREDENTIALS

• Project Management Professional Certification	— Great Learning
• Post Graduate Certification in Data Science & Business Analytics	— UT Austin McCombs School of Business
• Executive Data Visualization & Storytelling with Power BI & Tableau	— Great Learning Executive Program
• Generative AI with Large Language Models & ChatGPT	— DeepLearning.AI / Coursera
• Git Version Control & Professional Collaborative Engineering	— Atlassian / Coursera
English Language Credentials / English Language Proficiency	
• IELTS: Overall Band: 6	• CELPIP: Overall Score: 7
